JANKO WINDOWS

ENTRANCE DOOR

Experience the perfect blend of comfort, security, and style with our custom-made entrance doors. Crafted from high-quality wood and featuring thermal insulated glazing, these doors harmonise the dynamic outside world with the tranquillity of your home.

Our doors come with advanced features, including multiple draught seals, 3D adjustable hinges, continuous lock stiles, and Plug Tec corner joints, ensuring robust, load-bearing performance with excellent heat and sound insulation. Enhanced with multiple point security locks and a thermal bridge-free sinkable door sill with double rubber seals, they offer superior protection against burglary while contributing to a harmonious living space.

Choose from a variety of profiles to suit your style: aluminium outside with wood inside, or wood on both sides. Aluminium stands up to harsh weather, UV radiation, and temperature extremes, while wood provides a timeless, cosy interior. Each door is meticulously crafted from premium materials, available in a range of colours and finishes to match your vision.

Every door we produce is unique, combining durability, elegance, and precision to meet your individual needs.

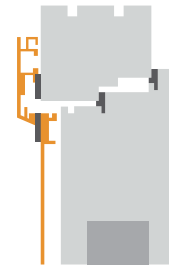

ICON LEGEND

PROFILE

WOOD- ALUMINIUM DOORS WITH FRAME INSERT STRUCTURE

Enhance your entrance with our wood-aluminium doors featuring a frame insert structure. The aluminium cover on the frame and exterior provides a robust protective shield while offering a unique, customised look.

Choose different colours and finishes for each side, and personalise your door further with options like flush-closing designs on one or both sides, antiqued surfaces, precious wood covers, varied grain directions and copper accents.

Whatever choices you make, the result will be a truly distinctive and eye-catching entrance.
